

SHORTCUTS

KEYBOARD · WORKBENCH

The workbench is built to be used without touching the mouse. This sheet mirrors the in-app shortcuts panel (?) or (⌘ /) minus your tags and events: each organization defines those on its deck, and they show on screen.

HOW TO READ THIS

- ⌘ Cmd on Mac · Ctrl on Windows and Linux
- ⌥ Option on Mac · Alt on Windows and Linux
- ⌘ Ctrl, on Mac too · ⇧ Shift
- HOLD A key you hold while tapping another.
- ■ ■ On the map: bare key · with ⌥ · with ⌘.

GOOD TO KNOW

Shortcuts pause while you type in a text field, while a dialog is open and while the drawing canvas is active (except **Space**) and the arrows).

Dashed keys on the map are free: bind them to tags and events in Decks & catalog. Reserved keys cannot be picked.

The macro pad, the Stream Deck and the remote pad fire the same actions; their keys are set up separately.
